Dragon's Egg, by Robert Forward - amazon.com

I like SciFi that has a firm foundation in real science, and Forward delivers this in spades with his book about life that evolves on the surface of a Neutron star.

Surface to Orbit - Atomic Rockets

Lifting your rocket from Terra's surface into circular orbit takes an unreasonably large amount of delta V. As a matter of fact, if your missions use Hohmann trajectories, the lift-off portion will take about the same delta V as does the Hohmann from Terra to the destination planet.

Gamma-ray burst - Wikipedia

Several models for the origin of gamma-ray bursts postulated that the initial burst of gamma rays should be followed by slowly fading emission at longer wavelengths created by collisions between the burst ejecta and interstellar gas. This fading emission would be called the "afterglow".
